Falconite Anti-Spatter #9192 was specially formulated to provide the best spatter protection available, using only non-hazardous additives. Cool Blue protects against spatter adhesion to the work piece and fixtures. Cool Blue significantly reduces costly labor and downtime for grinding, cleaning and equipment change out. Application of Cool Blue is easy with either a sprayer or brush. The unique water based formula keeps welded surfaces cooler and helps prevent bowing. Cool Blue is water based, free of any hazardous ingredients, and environmentally safe. It does **NOT** contain any types of solvents, ozone depletors, silicones, or oils. Cool Blue can be safely handled with no special storage precautions.

Available in 32oz. pump spray, 1gal., 5gal., 55 gal. drums

Falconite Nozzle Gel #9198 protects against spatter adhesion to the nozzle and tip keeping your torch in service longer. Unlike the old technology waxes, our nozzle gel stays in place at higher temperatures and can be applied immediately at startup when your torch is cold for instant protection. Application of Cool Blue is easy simply dip the nozzle at startup and periodically as needed. Cool Blue nozzle gel is water based keeping your torch cooler, free of any hazardous ingredients, and environmentally safe. It does **NOT** contain any types of solvents, ozone depletors, silicones, or oils. Cool Blue nozzle gel can be safely handled with no special storage precautions.

Available in 16oz. jars and cases of 12x16oz. Jars.
